

# HODOR BUGGY

The **HODOR Buggy** is designed for low level mobility needs. We can add lateral supports, headrests, hood and rain cover, but we mainly intended this for those 'quick in and out the car' situations.

We have added a reclining backrest to cater for children who have seizures and then need to rest afterwards.

The Hodor has a unique folding mechanism that links the backrest to the folding handle. This means that it only requires the one action of folding the buggy frame and the seat folds in as well. Folds neatly to fit in the boot of most cars, perfect for trips out.

## HODOR DIMENSIONS

	STANDARD	LARGE
SEAT WIDTH		
SEAT DEPTH		
BACKREST HEIGHT		
SEAT TO FOOTPLATE		
MAX OCCUPANT WEIGHT		
OVERALL WIDTH		
CHASSIS WEIGHT		
SEAT WEIGHT		

N.B The Hodor is currently being redeveloped due to customer feedback and dimensions will follow.
